54 PARK PLACE **NEW YORK**

## Grass Seed for Autumn Sowing

Autumn sowing is recommended from the latter part of August to the middle of September, so that the young grass may become well rooted before winter sets in. The sowing should be done when the ground is moist or before expected rain; after sowing the ground should be rolled.

### The Thorburn Lawn Grass

Many of the finest lawns in America were produced from this mixture. It is composed of permanent grasses that make a finer and thicker turf the older they become, and yet give a rich greensward in three or four weeks from the time of sowing. (The ordinary Central Park Lawn Grass Seed as usually sold is not to be compared with this superior mixture.) It should be sown at the rate of 4 to 5 bushels to the acre. Per pt. 15 cts., qt. 25 cts., 2 qts. 45 cts.,  $\frac{1}{2}$  pk. 75 cts., pk. \$1.40, bus. of 20 lbs. \$5.

### Thorburn's Grass Mixture for Shady Spots on Lawns

A mixture of grasses that thrive in shaded situations under trees, or close to walks where there is little sun. Per qt. 40 cts., 2 qts. 70 cts.,  $\frac{1}{2}$  pk. \$1.25, pk. \$2, bus. of 22 lbs. \$7.

### Thorburn's Grass Mixture for Terraces

A mixture of fine stoloniferous grasses peculiarly adapted to terraces. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$  pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.

### Thorburn's Lawn - Restoring Grass Seed

A mixture of grasses that will take firm hold and grow quickly on hard, worn-out or burned spots. Some **Lawn-restoring Grass Seed** should be sown before every summer rain on thin places. Per qt. 35c., 2 qts. 60c.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.

### Thorburn's Lawn Grass for the South

A mixture of grasses that stand extremes of heat and drought, and that are, therefore, peculiarly adapted to southern lawns. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.50.

## Also Permanent Grass Seed for Golf-Links, Tennis Courts Polo-Grounds, etc.

We have devoted much attention to the seeding and preservation of golf-links, tennis-courts and polo-grounds, and offer the following mixtures, which have been used on most of the finest links, etc., in this country with very satisfactory results.

### Tennis-Court Mixture

A mixture of extra-fine grasses peculiarly adapted to tennis-courts. This mixture will make a firm, green and lasting turf of the finest texture, that will improve with trampling. Per qt. 35 cts., 2 qts. 60 cts.,  $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.

### Grass Mixture for Railroad Banks, etc.

A mixture of grasses with long, interlacing, matting roots that will bind steep embankments, gravelly or sandy slopes, etc., preventing washouts by rainstorms and covering them with permanently green turf. Per qt. 30 cts., 2 qts. 50 cts.,  $\frac{1}{2}$ pk. 80 cts., pk. \$1.25, bus. of 18 lbs. \$4.50.

### Fair-Green or Golf-Links Mixture

For the grounds in general. Per bus. of 20 lbs. \$4.

### Putting-Green Mixture

A mixture of extra-fine grasses that will make a close, firm, green and lasting turf, which will improve with trampling. Per qt. 40 cts., 2 qts. 70 cts.,  $\frac{1}{2}$ pk. \$1.25, pk. \$2, bus. of 24 lbs. \$7.

### Polo-Grounds Mixture

A mixture of fine-leaved and deep-rooting grasses, forming a strong and lasting turf that will stand hard usage. Per bus. of 20 lbs. \$4.

## CATALOGUE

OF

### Bulbs and Flowering Roots, also Flower and Vegetable Seeds for Fall Planting

---

We have the pleasure of again presenting to our old friends and all interested in Gardening, our **ANNUAL CATALOGUE** of **Bulbs**, etc., for **Fall Planting**.

---

Even the most superficial lover of Nature must admit that the cultivation of **BULBS** for Winter and Spring flowering is a peculiarly interesting attraction, whether, when grown indoors, or scattered profusely throughout the extensive grounds of a country residence, or planted in and about the small suburban garden.

When the average man sees a pretty bed of Hyacinths, Tulips, or other showy Bulbs, in the Spring, he generally determines to have "something like that" in his own front or back garden next year, but when September or October arrives he is apt to forget all about the pretty bed until the Spring displays appear again. Therefore—order your Bulbs **EARLY** and plan out the beds for them now.

**Bulbs may be grown indoors in the winter months**, when flowers are most appreciated. By successive plantings a constant supply of blooms can be had from December until May. The finest outdoor displays of the early Spring months are also from bulbs planted in the

Autumn. The cultural directions found under the respective headings are worthy of careful attention.

**Our bulbs are all selected**, coming from the best growers, and should not be confounded with the cheap "case" bulbs sent to this country on speculation, and often sold at auction and otherwise, at very low prices.

**NAME AND ADDRESS.** *We often receive orders with either the name or the address of the sender omitted. As we can do nothing with such orders, the customer thinks his order is being neglected. We therefore beg our correspondents to be careful to write on each order their name and full address.*

**ORDERS** should be sent as soon as possible after receipt of this catalogue. *The bulbs will be shipped in proper time for planting. They are ready from August to November, according to the time of ripening and the country from which they come. Orders received earliest are sure of being filled in full. If left too late, the supply of some of the varieties may be exhausted.*

**Prices, as will be seen upon comparison with others are as low as Highest Grade Bulbs can be sold at, and do not include transportation.**

We indicate under each heading of the various Bulbs, the mailing weight when packed, so that if wanted by parcel post, our Customers can determine the amount required to be added for postage according to Zone rate, as per table below.

The weights given are those taken from our stock last year, and may vary in some instances; should there be any difference in weight when orders are filled, the postage will be adjusted, and any amounts over remitted will be returned.

On shipments of 15 lbs. and upwards it is best to send by express, wherever possible, as by special arrangements with the express companies, bulbs travel at a reduction of 25 per cent. from regular rates; it is therefore both safer, and, in nearly all cases, cheaper, to send large packages by express instead of by mail.

### PARCEL-POST ZONE RATES

#### Within the United States

# Hyacinths

THESE BULBS ARE READY FOR  
DELIVERY IN SEPTEMBER

If to be sent by mail add postage at zone rates

The Hyacinth is one of the most popular and beautiful spring-flowering plants for indoor and outdoor decoration. By careful management in keeping up a succession, it may be had in flower from the beginning of winter to the end of May. For a spring display in the open ground it is unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height, and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to anyone suitable sorts, when desired.

**OUTSIDE CULTURE.** In this section, October is the month to plant Hyacinths outside. They succeed best in a light soil and a sunny situation. If the soil is naturally heavy, some sand should be mixed with it, and if the beds have been occupied with other plants throughout the summer, some well-rotted cow manure should be added. The soil should be well dug to a depth of 14 inches, and raised from 2 to 4 inches above the level of the walk. The bulbs should be planted evenly, about 6 inches deep to the bottom of the bulb, and from 6 to 7 inches apart; if planted at uneven depths they will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs. Some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has been frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field-mice which may burrow into it.

**CULTURE IN POTS.** For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibrous loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulb should remain above the soil. The pots should then be buried in the open ground to the depth of 6 inches, and left there for five or six weeks, until they are well filled with roots. They may then be taken into the house, where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September to the end of November. Plenty of water should be applied, and manure-water is beneficial after the flower-spikes appear.

**CULTURE IN GLASSES.** Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in it to keep it pure. The glasses should be kept in a cool, dark closet for ten to twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gaslight. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

Customers unacquainted with the different varieties will do well to leave the selection to us, only specifying in their order whether bulbs are wanted for pot, glass or garden culture.

We invite special attention to the assortments of Named Hyacinths of our selection offered on page 4, and to the Hyacinth Glasses which are quoted at the end of the catalogue.

The names of our Hyacinths and Tulips are those given to them by the originators in Holland, and they are not sold under fancy names manufactured in this country

## Select Named Dutch Hyacinths

N. B. Our Select Named Hyacinths are the cream of the Holland nurseries—and are called top-roots—under their original names. For forcing in pots or for outdoor beds they far surpass the class of Bulbs usually sold.

The single-flowered varieties are generally more effective and better for forcing than the double ones. They also, as a rule, succeed better in glasses. The double varieties are distinguished by an asterisk (\*), and those of them that do well for forcing in water, by two asterisks (\*\*).

Italian Hyacinths

Mailing Weight, 1 lb. doz., 8 lbs. 100.

Grown largely by florists for cutting. The flowers are single, very graceful and fragrant, and produced abundantly. They are harder than the Romans, and may be planted outside in the fall for flowers for early spring cutting.

	Doz.	100
Single White .....	\$0 60	\$4 50
Single Pink .....	60	4 50

French Roman Hyacinths

Mailing Weight, 2 lbs. per doz.; 9 lbs. per 100

Extensively used by florists for forcing cut-flowers. For this purpose they are the best and most popular of bulbs. The flowers are delightfully fragrant, and each bulb will throw up from three to four spikes. For forcing, three or four bulbs are generally planted in a suitable pot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until they fill with roots, when the flower-spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown, and extremely early, and by making successive plantings they may be had in flower all through the winter. The blue Roman Hyacinths flower from one to two weeks later than the white variety.

	Each	Doz.	100
Pure White. First size.....	\$0 10	\$0 85	\$5 50
Pure White. Ex. size bulbs. 15	1 25	7 00

Miniature Hyacinths

Mailing Weight, 2 lbs. doz.; 10 lbs. 100.

These are also known as "Dutch Roman" and "Pan Hyacinths." They are very suitable for growing in groups in pots or earthen pans.

White, Bright Red, Blue all shades. 5 cts. each, 50 cts. per doz., \$3.50 per 100.

Mixed Colors. 45 cts. per doz., \$3.00 per 100.

French Roman Hyacinths

## Tulips

READY FOR DELIVERY  
IN SEPTEMBER

If to be sent by mail add postage at zone rates

For beauty of form and brilliancy of coloring, Tulips are unequalled. For bedding they are the most popular and effective of all hardy bulbous plants. In our descriptions we give the color and height, medium or tall, to which they grow, so that purchasers may select suitable sorts for forming display beds in design. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot culture and forcing for winter cut-flowers they are also invaluable.

**CULTURE.**—The cultural directions given for hyacinths, on page 3, are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the bottom of the bulb is deep enough, and a distance of 5 or 6 in. between the bulbs is sufficient. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. To obtain the best results it is desirable that they should not be planted in ground where Tulips were grown the previous year. We recommend early planting so that the bulbs may obtain a good root growth before frost sets in. For pot culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From three to five bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for hyacinths. Most of the varieties named below are equally well adapted for pot culture or the open ground.

### Duc Van Thol Tulips

Six of a kind at dozen rate, 50 of a kind at 100 rate

If to be sent by mail add postage at zone rates—1 lb. doz., 6 lbs. 100.

The Duc Van Thols are the earliest of all the Tulips. They are of dwarf habit, and well adapted for forcing and for pot culture. They bloom outdoors before the Single Early Tulips.

	Doz.	100
Red. Bordered with yellow.....	\$0 45	\$2 50

## Double Tulips

Six of a kind at dozen rate, 50 at 100 rate.

If to be sent by mail add postage at zone rates—1 lb. doz., 5 lbs. 100.

The Double Tulips come into bloom a little later than the single varieties. They are splendid for bedding, and the flowers last longer in bloom than the single ones. Some sorts are quite dwarf. Comparative earliness of flowering is indicated by the letters A B C. "Medium" and "tall" indicate relative height.

Darwin Tulips,  
Clara Butt  
(Salmon-rose)

## Parrot Tulips

For outdoor cultivation. The petals of these have feathered edges, and, in addition to other colors, combine shades of green—a peculiarity confined to this class. The flowers are very singular and picturesque, of large size and brilliant colors, and form very effective groups for the flower-border. To get the best results they must have the full effect of the sun. Very late-flowering.

**Narcissus****NARCISSUS ARE READY FOR DELIVERY IN SEPTEMBER**

Narcissus are among the most popular and largely grown of spring-flowering bulbs, and deservedly, too. Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, lakes or ponds, and in mixed flower—or shrubbery—borders. They are also suitable for naturalizing in the grass, by the side of woodland walks, or in open spaces between trees and shrubs.

For growing in pots they require about the same treatment as hyacinths, three or four bulbs in a 5-inch pot. Some of the varieties are grown in large numbers by florists for winter cut-flowers. With the exception of the Polyanthus section, they are all perfectly hardy.

**Single Narcissus, or Daffodils****ALL LARGEST-SIZED BULBS**

If to be sent by mail add postage of zone rates as per weights indicated.

**Large-Crown, or Trumpet Narcissus**

The varieties belonging to this division have trumpets or crowns that are as long as, or longer than, the perianth segments.

## Single Narcissus, continued

If to be sent by mail, add postage at zone rates as per weights indicated.

## Bicolor

	Doz.	100
<b>Albicans</b> (White Spanish Daffodil). White perianth primrose trumpet. 2 lbs. doz., 10 lbs. 100.....	\$0 50	\$3 00

<b>Van Waveren's Giant</b> , the largest of all Narcissi, flowers of huge dimensions. Perianth primrose, bright yellow trumpet. 2 lbs. doz., 12 lbs. 100.....	each \$1.25.	14 00

## Short-Trumpet Narcissus

## Incomparabilis

These are crosses between the Yellow Trumpet and Poeticus. The color of the perianth is usually yellow or white.

	Doz.	100
<b>Beauty</b> , perianth sulphur, barred yellow, large cup margined orange scarlet. 2 lbs. doz., 8 lbs. 100.....	\$0 90	\$5 00
<b>Cynosure</b> . Primrose perianth, changing to white, cup pale orange. 2 lbs. doz., 8 lbs. 100.....	30	1 50
<b>Figaro</b> . Orange cup. Yellow perianth. 2 lbs. doz., 8 lbs. 100.....	30	1 75
<b>Simplex</b> . Single; yellow; early. Fine for cutting; also for forcing. 2 lbs. doz., 8 lbs. 100.....	30	1 75
<b>Sir Watkin</b> . Perianth sulphur, crown yellow, tinged bright orange. This is still the king of the short-cupped Narcissus, and used more generally and in larger quantities than any other short-cupped variety. Valuable as a cut-flower. First size. 3 lbs. doz., 16 lbs. 100.....	60	3 50
<b>Stella</b> . White perianth, yellow cup. Good forcer. 1 lb. doz., 5 lbs. 100.....	30	1 50

## Leedsii

These are crosses between the White Trumpets and Poeticus. The crowns are as large as those of the Incomparabilis group. The perianths are always white; the crowns are mostly white or light yellow.

	Doz.	100
<b>Leedsii Type</b> . Silvery white, lemon cup. 1 lb. doz., 5 lbs. 100.....	\$0 30	\$1 50
<b>Duchess of Brabant</b> . White perianth, lemon cup. Good for forcing. 2 lbs. doz., 14 lbs. 100.....	30	1 75
<b>Minnie Hume</b> (Queen of England). Large white perianth, cup passing from fine lemon to white. 1 lb. doz., 6 lbs. 100.....	30	1 75
<b>Mrs. Langtry</b> . Pure white perianth, large white cup, edged yellow. Splendid for cutting or naturalizing. 1 lb. doz., 5 lbs. 100.....	30	1 75

## Narcissus poeticus

Varieties belonging to this group always have a pure white perianth. The cups are very short, but wide-mouthed, and always more or less deeply rimmed with orange or scarlet.

	Doz.	100
<b>Ornatus</b> . Perianth pure white, cup yellow, margined scarlet. One of the most popular of all; useful for cut-flowers; very early flowering. Mother Bulbs. 1 lb. doz., 4 lbs. 100.....	\$0 30	\$1 75
<b>Recurvis</b> (The Old Pheasant's Eye). Pure white perianth, scarlet cup; late. 1 lb. doz., 7 lbs. 100.....	30	1 50

## Narcissus Poetaz Hybrids

New Hybrids between Poeticus Ornatus and Polyanthus Varieties.

	Doz.	100
<b>Aspasia</b> . Perianth pure white, yellow eye, large flowers. 2 lbs. doz., 9 lbs. 100.....	\$0 75	\$4 00
<b>Ideal</b> . Perianth white, dark orange eye. 6 to 7 flowers on a stem. 2 lbs. doz., 9 lbs. 100.....	60	3 50

## Various Single Narcissus

	Doz.	100
<b>Bulbocodium citrinum</b> (Hoop Petticoat). Pale sulphur-yellow, 1 lb. per doz.....	\$0 85	\$5 00
<b>Bulbocodium conspicuum</b> . Golden yellow, 1 lb. per doz.....	75	4 50
<b>Tenuior</b> (Silver Jonquil). Sulphur-white perianth, yellow cup. A rush-leaved, dwarf variety, splendid for rock-work, 1 lb. per doz.....	70	4 00
<b>Single Trumpets, Mixed</b> . 2 lbs. doz., 9 lbs. 100.....	30	1 75
<b>Single, All Sorts Mixed</b> . 2 lbs. doz., 9 lbs. 100.....	30	1 50

If to be sent by mail add postage at zone rates, as per weight indicated.

## Double Narcissus

	Doz.	100
<b>Alba plena odorata.</b> Pure white; a splendid cut flower; sweet-scented. For outdoors. 1 lb. doz., 5 lbs. 100 .....	\$0 30	\$1 50
<b>Incomparabilis</b> (Butter and Eggs). Light yellow. For forcing. 2 lbs. doz., 15 lbs. 100 .....	35	2 00
<b>Orange Phoenix</b> (Bacon and Eggs). Large; double; white with orange base. 2 lbs. doz., 12 lbs. 100....	40	2 50
<b>Sulphur Phoenix.</b> Large; double; white with sulphur center. Not good for growing in pots on account of its weak foliage, but a splendid variety for cutting. The flower is rose-shaped and is of a most pleasing silvery white shade. 2 lbs. doz., 10 lbs. 100..	40	2 50
<b>Tazetta.</b> (Early Yellow Roman.) Earliest yellow for forcing. 2 lbs. doz., 10 lbs. 100 .....	35	2 00
<b>Von Sion.</b> The largest double yellow Trumpet variety. Extra fine for forcing; largely grown by florists for winter cut-flowers. Our bulbs are Dutch-grown, of the pure golden yellow variety, and of the largest size. 2 lbs. doz., 12 lbs. 100 .....	50	3 00
<b>Von Sion.</b> Double-nosed bulbs. 2 lbs. doz., 14 lbs. 100 .....	75	4 00

## Polyanthus Narcissus

The varieties belonging to this class produce small, fragrant flowers growing in clusters. They are invaluable for forcing and may be grown under glass or in pots. If planted in the open border they must be protected over winter by a covering of litter.

	Each	Doz.	100
<b>Bazelman Major.</b> Broad white perianth, deep yellow cup; largest of all. 2 lbs. doz., 12 lbs. 100 .....	\$0 10	\$1 00	\$6 00
<b>Gloriosa.</b> White perianth, deep orange cup; very striking. 3 lbs. doz., 24 lbs. 100 .....	10	90	5 00

Paper White Narcissus

Double Narcissus, Von Sion

	Each	Doz.	100
<b>Grand Monarque.</b> White, with yellow cup; very large flowers; vigorous grower. 2 lbs. doz., 12 lbs. 100 .....	\$0 10	\$0 90	\$5 00
<b>Grand Soleil d'Or.</b> Yellow, with orange cup; very free-blooming. 2 lbs. doz., 11 lbs. 100 .....	10	90	5 00
<b>Her Majesty.</b> White, yellow cup; extra large flower. 2 lbs. doz., 11 lbs. 100 .....	10	90	5 00
<b>Jaune Supreme.</b> Primrose, orange cup. 2 lbs. doz., 11 lbs. 100 .....	12	1 00	6 00
<b>White Pearl.</b> Perianth pure white, cup primrose; fine for cutting. 2 lbs. doz., 14 lbs. 100 .....	10	75	4 00
<b>Mixed Sorts.</b> 2 lbs. doz., 12 lbs. 100 .....	40	2 00	

## Paper-White Narcissus

	Doz.	100
<b>Paper-White grandiflorus.</b> Large trusses of pure white flowers. Splendid forcer. Large bulbs. 2 lbs. doz., 12 lbs. 100 .....	\$0 40	\$2 50

## Jonquils

Not less than 50 of a kind at 100 rate.

A class related to the Narcissus, and suitable alike for pot culture or planting out. Culture same as for hyacinths.		
<b>Single Yellow Sweet-scented.</b> Per 1,000, \$6.00. 4 oz. doz., 2 lbs. 100 .....	\$0 25	\$1 00
<b>Large Single (Campernelle).</b> Yellow; per 1,000, \$7.50. 8 oz. doz., 4 lbs. 100 .....	25	1 25

<b>Silver Jonquil</b> (Narcissus tenuior). 1 lb. doz. ....	70	4 00

If to be sent by mail add postage at zone rates as per weight indicated.

## Lilies

For stateliness of habit, beauty of form and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown and require little care. With the exception of *Lilium candidum* and *Lilium tigrinum*, which prefer a deep, rich loam, they all do best in a light, well-drained soil. Some peat or leaf-mold may be used to advantage. *Lilium auratum* cannot bear manure but thrives in ordinary light soil. They all prefer a partial shade, and the taller sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot culture, a compost of loam and peat in equal parts, with the addition of some sand, is recommended.

*Lilium Harrisii* and *Lilium candidum* ready in August; others not until November.

### Lilium Harrisii

(Bermuda Easter Lily)

BULBS NOW READY.

The Bermuda Easter Lily is perhaps the finest and most popular of winter-blooming plants. The large, handsome, pure white, trumpet-shaped flowers are very sweet-scented and of great substance, lasting a long time after cutting. Its stately and graceful habit renders it a perfect pot-plant for table or window decoration. It gets its popular name from the fact that it is so largely used for church decoration at Easter. It is easily grown and can be forced into flower in a remarkably short time. It requires rich soil but without manure. It is also well adapted to garden culture, but in this latitude the bulbs should have a good covering of ashes or litter to protect them over winter.

	Each	Doz.	100
5 to 7 inches in circumference. 2 lbs. doz., 11 lbs. 100	\$0 20	\$1 50	\$8 50
7 to 9 inches in circumference. 3 lbs. doz., 17 lbs. 100	35	2 50	15 00
9 to 11 inches in circumference. 4 lbs. doz.	65	6 00	

### Lilium longiflorum (White Trumpet Lily)

This is among the most beautiful and valuable of garden Lilies. It grows from 1 to 4 feet high, and bears many trumpet-shaped, sweetly scented, waxy white flowers of great substance. A well-drained, light loam enriched with leaf-mold suits it best.

## Lily-of-the-Valley

(*Convallaria majalis*)

READY IN NOVEMBER AND  
DECEMBER

One of the most beautiful and admired spring-flowering plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them. They may also be planted in moss fiber in vases.

**Clumps.** Fine, large clumps, with many flowering pips on each. Fine for planting outside in shaded positions and for naturalizing by the side of streams or wood walks. Weight 3 lbs. each. 30 cts each, \$3 per doz., \$20 per 100.

**Pips for Forcing.** 50 cts. per bundle of 25, (2-lb. rate), \$1.75; per 100, \$15 per 1,000.

Lily-of-the-Valley.

## Chinese Sacred Lily

(The Water Fairy Flower)

READY IN SEPTEMBER

A variety of the Polyanthus Narcissus, imported from China. The bulbs should be placed from three to six in a bowl or glass dish of water which has been partly filled with pebbles, some of which place over the bulbs so as to prevent them from floating. The water should be tepid and changed every two days. Submerge the bulbs entirely and place in a sunny window in a cool room. 15 cts. each, \$1.25 per doz. Mailing weight, 4-lb. doz.

## Allium

Mailing Weight, 1 lb. 100.

Perfectly hardy bulbous plants of the easiest cultivation. They are excellent for the flower border or for naturalizing in masses. The varieties offered below are also suitable for forcing for winter cut-flowers.

**Azureum.** Beautiful sky-blue flowers in large umbels; fine for pots or garden. 15 cts. each, \$1.50 per doz., \$10.00 per 100.

**Neapolitanum.** Large umbels of pure white flowers, borne on large stems; valuable for forcing for winter cut-flowers, as well as for summer garden decoration. 25 cts. per doz., \$1.25 per 100.

ALLIUM

**Moly luteum.** Golden yellow flowers in large umbels; very showy and attractive; fine for growing in the garden in groups or for naturalizing in masses. 25 cts. per doz., \$1.25 per 100.

**Hermettii grandiflorum.** Makes a splendid pot-plant for winter-blooming in the house, the handsome, large, pure white flowers being produced abundantly and for a long time; largely used by florists for cut-flowers. 35 cts. per doz., \$2.00 per 100.

**Amaryllis** READY IN OCTOBER

If to be sent by mail add postage at zone rates, as per weight indicated.

Extremely ornamental greenhouse plants, with large, fragrant, beautifully colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mold or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Established bulbs in large pots should have a top-dressing each year when starting, and manure-water during the growing season.

**Belladonna major.** Violet and white; flowers in large umbels; fragrant. 4 lbs. doz.—25 cts. each, \$2.25 per doz.

**Belladonna speciosa purpurea.** 4 lbs. doz. 65 cts. each, \$6.50 per doz.

**Empress of India Seedlings.** Large flowers, brilliant scarlet with white stripes. 4 lbs. doz. 75 cts. each, \$8 per doz.

**Hippeastrum Johnsonii** (Spice Lily). Beautiful flowers; crimson, striped white. Large bulbs. 6 lbs. doz. 65 cts. each, \$6 per doz.

**Hippeastrum, New Vittata Hybrids.** Beautiful colors. 4 lbs. doz. 65 cts. each, \$6 per doz.

**Josephine** (Gigantea). Very fine scarlet; flowering in immense umbels; these are extra-sized bulbs. 1 lb. each, \$5 each.

**Lily of the Palace.** Very large, handsome flowers, crimson shaded with green. 4 lbs. doz. 75 cts. each, \$8 per doz.

Anemone  
Coronaria

**Anemone, or Windflower**

If to be sent by mail add postage at zone rates  
—6 oz. doz., 3 lbs. 100.

Very ornamental hardy perennials, producing beautifully colored flowers in spring and summer. They do best in rich soil and in a sheltered and well-drained position. Plant in autumn. May also be grown in pots or forced in frames for early flowers.

**Coronari or Poppy-Flowered Anemone**

## Crocus

If to be sent by mail add postage at zone rates—8 oz doz., 3 lbs. 100.

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted closely—say 2 inches apart—and 3 inches deep, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years. Should be largely planted in the grass on lawns. They will flower very early in spring before mowing. The effect is beautiful. For flowering in pots, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

	Doz.	100	1,000
<b>Cloth of Gold.</b> Golden yellow, striped brown .....	\$0 15	\$0 75	\$5 00
<b>Cloth of Silver.</b> Light blue, striped	20	1 25	10 00
<b>Mixed Colors .....</b>	15	75	5 00

Not less than one dozen of a kind at dozen rate.

## Hybrid Named Crocus

Remarkable for richness of color and immense size. These varieties are best for forming letters or designs on lawns, for which purpose they may be planted without disturbing the grass, by the use of a dibble or narrow trowel. Flowers are produced very early, and mowing later on will not seriously injure the bulbs.

## Crown Imperials

(Fritillaria imperialis)

READY IN SEPTEMBER

If to be sent by mail add postage at zone rates—each 1 lb., doz. 6 lbs.

A stately-growing plant, with dark green foliage and flowers of all intermediate shades between yellow and crimson; effective for centers of beds; hardy and permanent, and not so generally planted as they should be. Their flowers are produced quite early in spring and are very ornamental and decorative in the center of a bed of other bulbous plants. The old, dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and

Crown Imperial  
Maximus (Red)

If to be sent by mail add postage at zone rates

### Crown Imperials, continued

desirable in every respect. They are all the better for being planted in good rich, well-drained soil; the flowers will be larger and of finer coloring, as well as more enduring.

### Crinum

If to be sent by mail add postage at zone rates as per weights indicated.

Splendid, large-flowering bulbs, closely allied to the amaryllis. The most suitable soil is a compost of turfy loam, cow-manure and some sand. They should be grown in large pots or tubs, about three-fourths of the bulb being out of the soil. In late fall they should be removed to a coolhouse and allowed to rest until new leaves begin to appear in February. The bulbs should receive a top-dressing each year when starting, and manure-water during the growing season. They may be placed outside when warm weather begins, and will flower all through the summer, making splendid lawn or veranda plants.

Cyclamen Persicum Giganteum.

<b>Asiaticum.</b> Pure white. Large bulbs. 5 lb. rate.....	Each \$1 00
<b>Amabile, Giant Pink.</b> Extra large, bright pink, with white stripe; splendid flower; enormous bulbs. Unsurpassed for growing in tubs, blooming profusely outside all summer, and forming a most excellent porch decoration. 11 lb. rate .....	2 50

<b>Powellii album.</b> Pure white. 2 lb. rate .....	50

### Cyclamen MOST OF THEM READY IN NOVEMBER

When well grown, it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white, and of much elegance of form in flower and plant. The soil best suited to them is a fresh, turfy loam, with a fourth to a fifth of well-rotted horse manure, to which add some clean sand if the soil is heavy. Plant so as to leave the top of the bulb just below the surface. Given the proper conditions, the Cyclamen is remarkably easy to grow. (We offer seed of our superb strain of *C. giganteum* at the end of this catalogue.)

	Each	Doz.

### Eremurus READY IN SEPTEMBER

If to be sent by mail add postage at zone rates—1 lb. each.

A noble, bulbous plant from northern India, especially attractive, peerless in its majestic magnificence, compelling admiration by its gigantic proportions and the sweetness of its perfume, a plant not easily forgotten when seen well grown. It is a hyacinth-like perennial, starting growth quite early in the spring. Coming from a cold country it is perfectly hardy, but enjoys good, rich soil, and responds handsomely to liberal treatment. They thrive admirably in deep, rich, sandy loam

Eremurus.

If to be sent by mail add postage at zone rates

**Eremurus, continued**

with the addition of well-decayed cow manure. They need plenty of water in the flowering period, but require good drainage. When well established they should not be disturbed, as the roots are extremely brittle. The surface soil above the roots should be kept clean by hand-weeding and enriched by occasional application of old manure, leaf-mold and a little sand well mixed. Autumn planting is desirable, and the crown should be covered with a mound of ashes over winter, or with a box with a water-tight top and filled with dry leaves. Protect the stems from frost when coming into flower in spring.

**Himalaicus.** Beautiful white flowers on racemes 4 to 8 feet high. Blooms in May and June.....**Each**  
**Robustus.** Rosy lilac flowers on racemes 6 to 19 feet high, flowering in June.....**\$1.25**

 \$2.50 per 100.  
**Fritillaria imperialis.** See Crown Imperials,  
 page 18

**Freesia**

If to be sent by mail add postage at zone  
 rates—doz. 4 oz., 100 2 lbs.

The justly popular Freesias are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in good, loamy soil, with an admixture of leaf-mold and sand, in a frame or greenhouse, and are excellent for window culture in winter. For the information of all not acquainted with these bulbs, we may say that they are quite small, but produce large blooms in comparison to their size.

**Freesia refracta alba.** The body of the flower is a pure white, with lower segments spotted lemon-yellow. Their fragrance is remarkable and very lasting. Mammoth-size bulbs. 50 cts. per doz., \$3.00 per 100, \$16.00 per 1,000.

**Freesia, "Purity."** Magnificent, glistening pure white flowers of large size, borne on strong, lengthy stems, each truss bearing eight to ten buds, five or six of which are frequently open at the same time. Mammoth bulbs. 90 cts. per doz., \$6 per 100

First size bulbs. 50 cts. per doz., \$3.50 per 100

Second size bulbs. 40 cts. per doz., \$2.75 per 100

**Freesia Leichtlinii major.** Creamy white, shading to yellow, with orange blotch; distinct. 40 cts. per doz., \$2.50 per 100.

**Freesia, "Purity"**

**Erythronium** (Dog's-Tooth Violets)

**READY IN SEPTEMBER**

If to be sent by mail add postage at zone rates—  
 doz. 4 oz.; 100 2 lb.

Very ornamental, hardy bulbous plants of neat and dwarf habit. They succeed in almost any light soil, but prefer a mixture of loam and peat. They should be planted in groups, and do well in a sheltered position on rockeries, or in mixed flower- or shrubbery-borders.

	Each	Doz.	100
<b>Americanum.</b> Bright yellow flowers; mottled leaves; segments recurved.	\$0 15	\$1 25	\$8 00
<b>Californicum.</b> Cream-yellow, with maroon band at base; leaves mottled.	10	60	4 50
<b>Giganteum</b> (Giant Dog's-Tooth Violet). Large, straw-colored flowers, orange centers, borne on long, slender stems. Foliage richly mottled; fine pot-plant.	10	75	4 75
<b>Citrium.</b> Leaves mottled; flowers yellow	10	75	4 75
	10	60	4 50
	10	30	1 50

Gladiolus Colvillei.

Gloxinias are among the most beautiful of greenhouse plants, being remarkable for the intensity and variety of their colorings and the exquisite manner in which they are often blotched, mottled, penciled and blended. The plants are extremely floriferous, and, by making successive pottings, they may be had in bloom the greater part of the year. They thrive best in a soil composed of leaf-mold and peat in equal parts, with a little sand added. When growing, plenty of water should be supplied, but it should always be tepid. The bulbs we offer are large, and of erect-flowering strain:

**Iris**

(Fleur-de-lis)

**READY IN OCTOBER AND NOVEMBER, EXCEPT JAPAN IRIS, WHICH WILL NOT BE READY UNTIL DECEMBER AND INTO SPRING**

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together. Irises are of easy culture. They do best in a light, rich, sandy soil, and in a sunny situation. With the exception of *Morea Pavonia*, all varieties are hardy. Good drainage is important. The varieties of *Iris Kaempferi*, from Japan, are remarkable for the beauty of their colors and their stateliness of habit. Some of these send up 10 to 12 flower-spikes 3 feet high, each bearing 2 to 4 enormous blossoms measuring 8 to 10 inches across. These require a liberal supply of water when growing.

**Dwarf Gladiolus****READY IN NOVEMBER**

If to be sent by mail add postage at zone rates—  
doz. 6 oz., 100 2 lb.

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in a warm room or greenhouse. Some varieties are successfully forced and may be had in full beauty in April and May.

These form a family of bulbs of rare beauty and of most exquisite tints and shades; and, from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of the garden at a season when flowers of vivid tints are scarce. They are valuable for bedding. Named varieties will be found in our General Catalogue, published January 1.

Japan Iris (*Iris Kaempferi*)

## IRIS, continued

**Superb Collection of Large-Flowered Japan Iris (Iris Kaempferi)**

READY IN DECEMBER AND INTO SPRING

If to be sent by mail add postage at zone rates—each 1 lb., doz. 12 lbs.

30 cents each, \$3 per dozen, \$20 per 100.

We are importing from Japan a large supply of the following twenty of the best of these magnificent Iris, which excel in size, perfection of form and richness of color. These are most valuable for cut flowers and table decoration—as handsome as orchards. Flowers should be cut in the early morning or after sunset. The roots come in large clumps. The description given are those furnished us by the growers in Japan. May be ordered by numbers.

- 13 Boteki-no-Koe. Pure white, heavily veined lavender, with pale primrose blotches; standards wine-color, lighter toward edges, stigmas lavender. Three large petals. Striking.
- 26 Date-dogu. Rich claret-red, yellow blotches. Three petals.
- 89 Fuyoho. Large; pure white, yellow blotches; three very large petals.
- 31 Gei-Sho-Un. Claret-red, veined white; standards shaded lavender, darker toward the edges, yellow blotches.
- 4 Ho-o-jo (Ho-o-Castle). Ruby-crimson, primrose blotches; standards white and lavender.
- 37 Katsuraotoko. White, veined lavender; standards white, suffused with lavender, darker toward the edges, pale yellow blotches. Six petals.
- 15 Momiji-no-Taki. Ruby-red, yellow blotches; standards white, spotted toward edges pale wine-color. Six petals.
- 30 Noboro-Ryu. Intense Tyrian blue, with yellow blotches; standards white, edged violet.
- 9 Ran. Royal purple, edged lavender, with large primrose blotches; standards wine-red, white at base. Six petals; large and distinct.
- 34 Sassa-no-Koe. White, veined wine-red and blotched yellow; standards lavender, running to purple at edges. Three petals.
- 20 Senjo-To. Light wine-color, spotted and shaded to dark red toward the edges of the petals, suffused with white, yellow blotches; standards shading to purple.
- 40 Shiguremomiji. Blush-pink, darker toward edges, splashed wine-red; stigmas lavender, primrose blotches. Three petals.
- 21 Shikainami. Light blue, shading to dark blue edges, white-veined, yellow blotches; standards shaded lavender, with dark edges. Six petals.
- 6 Shippo (Cloisonne). Rich tyrian blue, edged purple and veined white, yellow blotches; standards white and wine-color. Large flowers.
- 14 Shiraga. Deep purple, heavily veined white; standards lavender, darker toward edges, yellow blotches. Large flowers. Six petals.
- 17 Suibijin. Claret-red, darker toward edges; standards white, veined and edged pale wine-color; stigmas wine-color; three petals.
- 44 Ujigawa. Rich, vinous purple; standards blush-pink; stigmas lavender, radiating to purple edges, canary-yellow blotches. Three immense petals.
- 50 Ushio-no-Iro. Violet, veined white; standards white, edged sky-blue, yellow blotches. Seven or eight petals.
- 7 Yamato-Nishiki. Pale lavender, running to purple on outside of petals, blotched and flaked dark purple, large primrose blotches. Immense flower. Three petals.
- 8 Yodokuruma. Pale wine-color, veined darker, large orange blotches; standards very erect. Gigantic blooms. Three petals.

## Ixias READY IN OCTOBER

If to be sent by mail add postage at zone rates

The named Hybrid Ixias are so beautiful and rich in tints that no lover of flowers should be without them. They are equally adapted for pots or the open ground, exceedingly free-flowering, and invaluable for cutting. If planted out, they require rather more covering during winter than hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the Ixias attract much attention.

## Lachenalia READY IN SEPTEMBER

Mailed Free.

Very pretty, spring-flowering, greenhouse bulbous plants of elegant habit and with brightly colored flowers. They should be grown in pots, four to six bulbs in a 5-inch pot, in a compost of two parts loam, two parts leaf-mold and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air and keep near the glass to insure sturdy growth. Lachenalias are also excellent subjects for hanging-baskets.

<i>Muscari racemosum</i> . Blue Starch Hyacinth.....	35	2 00

**Nerine**

READY IN OCTOBER AND NOVEMBER.

Mailed Free.

Very beautiful greenhouse bulbous plants succeeding best in pots in light soil—say a compost of loam, leaf-mold and sand. Frequent re-potting is not advisable, but an annual top-dressing of new soil before the flowering season is recommended. During the growing season they succeed best in a frame with some bottom heat. After the leaves die, they should be kept quite dry in a cool place until they begin to grow again.

	Each
<i>Flexuosa</i> . Bright crimson-scarlet, tinged with orange.....	\$3 00
<i>Flexuosa alba</i> . Pure white.....	2 50
<i>Fothergilli major</i> . A magnificent plant for house or conservatory. Intense shining scarlet. By artificial light the crystalline cells of the petals sparkle like jewels. Flowers freely.....	1 75
<i>Sarniensis</i> (True Guernsey Lily). Flowers brilliant crimson, in large clusters. The best-known sort .....	\$0 60
<i>Undulata</i> . Rosy carmine, edged white; very handsome.....	1 00

**Oxalis**

READY IN SEPTEMBER

If to be sent by mail add postage at zone rates—1 lb. per 100.

A very pleasing class of small bulbs, producing vast quantities of brilliant flowers during the autumn and winter months; they are especially desirable for planting in hanging-baskets. They are easily grown in a sandy soil, seven or eight bulbs in a 4- or 5-inch pot. Pot in September, and remove indoors early in October; keep in moderate temperature.

	Doz.	100
<i>Buttercup</i> . A splendid winter-blooming plant for pot culture. The flowers are pure, bright yellow, and produced in great abundance. It is very easily cultivated and, being a strong grower, only one or two bulbs should be planted in a 5- or 6-inch pot. First size.....	\$0 25	\$2 00

<i>Mixed</i> .....	20	1 00

Muscari, or Grape Hyacinth.

## Paeonies

READY IN OCTOBER.

(Finest Imported Roots)

If to be sent by mail add postage at zone rates—1 lb. each, 9 lbs. doz.

The old-fashioned double Paeonies are too well known to require description. Their popularity is due to their great merits—their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Paeonies rank about first for lawn or flower-border or shrubbery decoration. Paeonies do best in deep, rich, rather moist soil. The plants are gross feeders, and the soil should be well worked before planting, and enriched with cow manure. Clean cultivation should be given. An annual top-dressing of short, well-rotted manure should be given in November, and forked into the soil in spring. Liquid manure, given in the growing season, helps the bloom wonderfully. They need abundant water, and if they suffer from drought at blooming time there are likely to be small flowers and blighted buds. The crowns should be set in planting about 2 inches below the surface. They may be set in spring or fall, to bloom the following summer. They are all hardy. We offer only strong, flowering roots, with not less than three eyes.

## Richardia (Calla)

READY IN OCTOBER AND NOVEMBER

If to be sent by mail add postage at zone rates as per weight indicated.

Tall-growing, bulbous perennials of graceful habit, and handsome foliage and flowers. They are easily cultivated in pots, requiring only rich soil and plenty of water. A compost of one part good loam and one part cow manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully repotting in September.

	Each	Doz.
<b>White Calla, or Lily of the Nile</b> ( <i>Calla aethiopica</i> ). Large, white, trumpet-shaped flowers of great substance. One of the most popular ornamental house and greenhouse plants. Largest-size bulbs. Doz. 4 lbs. ....	\$0 25	\$2 50

*Arum Palaestinum Sanctum.*

*Scilla Sibirica Alba*

## Scilla

READY IN SEPTEMBER

If to be sent by mail add postage at zone rates—6 oz. doz., 3 lbs. 100.

*S. Peruviana* requires slight protection; all the others are quite hardy, and may remain in the ground several years. The effect in early spring of the intensely rich blue, early-flowering *Scilla*, contrasting with the snow-white of the snow-drop and the varied hues of the crocus, is very striking; most valuable for permanent edging, or planted in bunches of a dozen or so.

	Doz.	100

## Snowdrops

(Galanthus nivalis)

READY IN SEPTEMBER

Mailing rate—1 oz. doz., 2 lbs. 100.

Perhaps no spring flower is a more general favorite than the Snowdrop. The earliest flowering of its varieties is the common single sort, which is also very graceful and beautiful, commencing to bloom before the snow is fairly off the ground in spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms. Should be planted 2 to 3 inches deep in a shady location.

**Single-flowering Snowdrops.** 25 cts. per doz., \$1.25 per 100, \$7.50 per 1,000.

**Double-flowering Snowdrops.** 30 cts. per doz., \$1.75 per 100, \$11 per 1,000.

**Giant Snowdrops of Asia Minor (Galanthus Elwesii).** Extra-size bulbs, 30 cts. per doz., \$1.75 per 100, \$12 per 1,000.

## Spiraea, or Astilbe

READY IN NOVEMBER

Mailing rate 2 lbs. each.

### Snowdrops.

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted, either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

	Each	Doz.
<b>Astilbe Arendsi, Ceres.</b> Bright rosy lilac; very fine.....	\$0 20	\$2 00
<b>Astilboides floribunda.</b> Very large, pure white plumes; neat habit; very abundant bloomer..	15	100
<b>GLADSTONE.</b> A hybrid Spiraea, with beautiful, snow-white plumes, borne on strong stems 1½ feet long, standing erect above the foliage. The plant is perfectly symmetrical in shape, the foliage very handsome and the flowers exquisitely fragrant. Fine forcer....	15	150
<b>Japonica (Hoteia).</b> Excellent pot-plant for winter-blooming. Large, branching panicles of pure white, feathery flowers; fine for cutting. Clumps for forcing or outdoor planting..	15	150
<b>Japonica compacta multiflora.</b> The neat, compact habit and profusion of large, handsome, pure white flowers make it a most elegant pot-plant.....	15	150

Each Doz.

**NAARDEN.** Pink-flowering; early bloomer. Fine forcer.....\$0 50 \$5 00

**QUEEN ALEXANDRA, PINK.** A splendid pink variety, in habit similar to the well-known Gladstone, but flowering two weeks later. It is a very free bloomer and bears its flowers well above the strong, dark green foliage. When forced it must be shaded, as soon as it starts to color. It is a splendid outdoor plant, being as hardy as the old Spiraea japonica. Its color will not fade even in the brightest weather.... 25 175

**WASHINGTON.** A splendid decorative plant, producing extra-large flowers. Strong grower; fine for forcing ..... 25 175

## Trillium

(American Wood-Lily, or Indian Shamrock)

Mailing rate—1 lb. doz., 7 lbs. 100.

Hardy herbaceous perennials succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during the summer. All are natives of North America, and are known by various common names in different localities. They have violently emetic roots.

Spiraea Naarden

Trillium sessile californicum

Sessile Snow Queen. Flowers pure white with creamy centers and with broad petals..	12	1 00	6 50

## Tuberoses

READY IN DECEMBER

Mailing rate—2 lbs. doz.

The purity of color and rich perfume of the Tuberoses are well known. In this latitude May 1 is early enough to plant in the open ground, but the bulbs may be started in pots much earlier if desired. They do best in a rich, warm soil and a sunny situation. Set so that the top will be 1 inch below the surface of the soil.

	Each	Doz.	100
Dwarf Double Pearl. Dwarf habit; large, fine flowers of great substance .....	\$0 08	\$0 50	\$2 00
Albino. Purest white; single flowers .....	10	60	3 50

Hyacinthus Candicans

Watsonia Ardernei

## Hardy Annual and Perennial Flower Seeds

FOR AUTUMN SOWING

Mailed free of postage

Many varieties of flower seeds, **Annuals** as well as **Biennials** and **Perennials**, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerous than if sown in the spring. For full descriptions see our General Seed Catalogue. Character and Hardiness indicated by letters A, Annual; B, Biennial; P, Perennial; h, hardy; hh, half hardy; g, greenhouse; t, tender.

**Hotchkiss Lawn Sprinkler No. 65.** Combination sprinkler and fountain. Brass and nickel-plated malleable iron runners. Covers an area 40 feet in diam., \$1.75.

## Horticultural Implements, Etc., continued

**Shower Sprinkler.** Mounted on holder for sprinkling lawns—or can be attached to hose for washing sidewalks, etc. Cannot clog or get out of order; will not rust. Holder and nozzle complete, \$2.

**Hotbed and Mushroom Bed Thermometer**

**Thermometers.** Hotbed and mushroom bed. Brass tips; made for plunging. Each, soft wood, \$1.25; boxwood, \$1.75.

**Self-Registering, Polished Back.** For indoor use; will register extremes of heat and cold; made of hardwood. A magnet is used to draw back the indicating points.

**Self-Registering**

Each  
10-in. ....\$2 00  
12-in. ....2 50

**Rubber Hose**

(Three-quarter inch)

Our hose is carefully selected, made of first-class material, and coupled at both ends, in 25- or 50-foot lengths.  
Electric. 20 cts. per ft.

**Thorburn Standard.** 5-ply, 12 cts. per ft.

X. 6-ply, 14 cts. per ft.

XX. 7-ply, 16 cts. per ft.

XXX. Best red, 7-ply, 18 cts. per ft.

**Bucket Spray Pump**

Made of brass; easily operated; throws a solid stream 50 feet. Provided with combination nozzle and sprinkler for flowers. 8-foot extension for spraying large trees, 60 cts. extra. Also valuable for washing windows. Price, \$3.75.

**"Auto-Spray" Pump**

Self-operating, durable, easy to carry and to work. Made of galvanized iron or brass, with 4-ply rubber hose. For spraying trees, shrubs, cleaning windows, etc. Price, with brass tank and stop-cock nozzle, \$7.50; with galvanized iron tank and stop-cock nozzle, \$5.00; with either kind of tank fitted with auto-pop nozzle, 50 cts. extra. Brass extension pipe, 2 feet, 45 cts. extra. "Auto-Pop" nozzle, if sold alone, \$1.50.

**The "Velvetlawn" Grass Seeder**

18 inches wide

The "Velvetlawn" Grass Seeder puts the seed into the soil where birds, wind and rain cannot get at it. Operator can drill any quantity of seed desired, and as the seed is all planted at an even depth in the ground, uniform growth is assured. Price \$15, net cash.

**Water Ballast Roller**

One- or two-section "Water Weight" Rollers, without counterbalancing haudle-weights.

No.	Diam. in.	Length in.	Sec. tions	Weight lbs. empty,	Weight lbs. filled with water,	Weight lbs. filled with sand,	Price
3....	14....	20....	1....	60....	200....	300....	\$8 00
5....	18....	24....	1....	75....	300....	500....	10 00
7....	24....	24....	1....	125....	500....	800....	12 00
11....	18....	24....	2....	100....	300....	500....	13 00
13....	24....	32....	2....	170....	650....	1,000....	17 00

If handle-weight is desired, add \$1.50 to above prices.
